

San Diego Association of Geologists *announces*

## Call for Papers

### FOR THE SDAG 2013 ANNUAL FIELD TRIP GUIDEBOOK

## ALTERNATIVE ROCKS: The Geology and Natural Resources Above and Below the San Luis Rey River Valley, Northern San Diego County, California

In this trip, we will explore the multitude of geologic and associated natural processes that have shaped the San Luis Rey river valley of north-central San Diego County. We hope to tour a variety of sites of geologic interest, demonstrating the:

- Mineral wealth, from precious gemstones to concrete aggregate,
- Geomorphic diversity, like landslides, terraces and maybe even a fault trace or two.
- Anything else our knowledgeable SDAG constituency can come up with....

As always, SDAG seeks new manuscripts based on original work in the broad fields of regional geology, sedimentology, soil, tectonics, hydrogeology, paleontology, engineering geology, petrology, geomorphology, paleoclimatology, landslides, and related fields. Given the locale, articles on the rich Native American history of the area are also welcome.

**Deadline for submission of abstract: Sunday March 17, 2013 (Saint Patrick's Day).**

Please submit the following information when submitting abstract:

- Title,
- Author(s) and affiliation,
- Address, e-mail, and telephone numbers for the corresponding author.

Submit abstract by e-mail to Brian J. Olson: [bolson@fsengineering.com](mailto:bolson@fsengineering.com) (858) 750-9243
