

SAN DIEGO ASSOCIATION OF GEOLOGISTS

M E E T I N G N O T I C E

Date: !!!! MONDAY, July 21, 1975 !!!!

← *different Day...*

Speaker: Mr. Jack Eagen: Mr. Eagen, Senior Engineering Geologist For Moore & Taber, received his B.A. in Geology at UCLA in 1955, and spent 1959-63 at USC doing graduate work in Geology and Engineering. He has a varied background having spent 1 year in the oil industry, 6 years with the California Division of Highways, and 1 year with Stone Geological Service before going to Moore & Taber where he has spent the last 10 years.

TOPIC

COMPACTION GROUTING: Compaction grouting is a process to stabilize and densify low strength, compressible-collapsible soils. It is often used as a corrective measure to raise and level settled and distressed structures and to prevent recurrence of the problem. The equipment, procedure, results, limitations, and case histories will be discussed. Slides will be used to supplement the talk.

TIME: Social Hour - 6:00 PM
 Dinner - 7:00 PM
 Speaker - 8:00 PM

LOCATION: Caesar's Mission Valley
 5010 Mission Center Road
 San Diego, California

RESERVATIONS: Please don't forget to make reservations by 4:00PM
 Friday, July 18, 1975, at 565-1955
