

SAN DIEGO ASSOCIATION OF GEOLOGISTS

JULY NEWSLETTER

JULY AND AUGUST MEETINGS: The mid-summer months have traditionally marked the time of vacations for many SDAG members, and it has generally been difficult to line-up speakers for July and August. Thus, as in years past, there will be no meetings of the San Diego Association of Geologists in either July or August. The next meeting is scheduled for Thursday, September 29. In the meantime, however, SDAG member Greg Farrand of GEOCON, Inc. is working on the details of a field trip in southwest San Diego County to look at some of the Miocene sediments constituting the Sweetwater and Otay Formations. The field trip will be augmented by a Guidebook containing recent papers on local geology. More information concerning the trip will be contained in the next newsletter.
